

## Objective

Look for twitter accounts for listed celebrities on wikipedia.

## Description

Going through the list of American film actresses on **wikipedia** and extract all the actress names. Then verify whether they have **twitter** accounts. If they do, record their twitter profile page URL. Instead of saving output data to a text file, it's a plus to store in database with actress/twitter\_url columns and make searchable by name(actress). **Mysql** is preferred. Attach output, text file or db dump, along with the codes.

## Output Sample

ACTRESS|TWITTER URL

Amy Acker|<https://twitter.com/AmyAcker>

Lauren Ambrose

Selena Gomez|<https://twitter.com/selenagomez>

Alyssa Milano|[https://twitter.com/alyssa\\_milano](https://twitter.com/alyssa_milano)

Taylor Swift

...

## Resource

Wikipedia

URL: [http://en.wikipedia.org/wiki/List\\_of\\_American\\_film\\_actresses](http://en.wikipedia.org/wiki/List_of_American_film_actresses)

## Language

Ruby on Rails
